Plaksin, I. N., Val'ter, A. K., and Gol'din, M. L.
DEVELOPMENT OF METHODS OF MEASURING THE
DENSITY OF SUSPENSIONS (Razvitiye Metodov
Izmereniya Plotnosti Pul'py). Nov 60 [9]p. 24 refs.
RTS 1629.

Order from LC or SLA mi\$1.80, ph\$1.80 61-15221

Trans. of Tsvetnyye Metally (USSR) 1959, v. 32,
no. 5, p. 16-22.

A literature survey shows that, the contact methods
for measuring density, the hydrostatic method is now
most widely used; it is based on the piezometric prin-
ciple. Piezometric instruments are satisfactory for
the measurement of density in suspensions of low spe-
cific gravity (up to 1.4 kg/litre). The method which
gives the most satisfactory results and has the great-
est development potential is the contactless method,
which is based on the relationship between the rate of
absorption of gamma-radiation and the density of the
suspension; it is therefore free from the disadvantages
